

The sports car for the wrist

24/07/2026 The sports car for the wrist

The 911 GT3 chronograph and 911 GT3 Touring Package chronograph are the elegant and racing-inspired counterparts for the wrist. Porsche always develops its sports cars and these exclusive watches simultaneously, to ensure that the watch design is perfectly in harmony with the car. All Porsche watches are produced in Porsche's own watchmaking workshop, which was founded in 2014 in Solothurn, Switzerland.

The housing of the 911 GT3 chronograph and the 911 GT3 Touring Package chronograph is made from titanium or titanium with a black titanium carbide coating, depending on the model. The strap and decorative stitching are made of genuine Porsche car leather in a colour matching the configuration of the customer's car. The dial matches the design of the Sport Chrono clock from the instrument panel. It features a new hexagonal shape and is finished in the same exterior colour as the car. The hour markers are raised, for clarity.

The 911 GT3 chronograph and 911 GT3 Touring Package chronograph models are reserved exclusively for owners of the new 911 GT3 or 911 GT3 with Touring Package, respectively. Both variants are

powered by the COSC-certified Porsche Design WERK 01.200 movement and a 911 GT3 rotor, or the 911 GT3 Weissach rotor for models with the Weissach Package. The rotor replicates the details of the car's wheels, even the centre cap with GT3 lettering or two-tone Porsche crest.

The 911 GT3 chronograph or 911 GT3 Touring Package chronograph can be further personalised with engraving. The vehicle identification number (VIN), for example, is a popular choice for this.
