

ESG Risks Supply Chain

Targeted reduction of environmental and human rights-related risks in the supply chain

ESG Requirements for Sourcings

Clear and transparent requirements to suppliers

ESG Performance Suppliers

Measurable increase in the sustainability performance of our suppliers

Transparency & Innovative Projects

Expansion of supply chain transparency and cooperations with innovative suppliers

Responsible Supply Chain System (ReSC)

26/05/2026 Porsche uses the ReSC system to fulfill its human rights and environmental due diligence obligations.

Porsche's responsibility does not end at the factory gates, which is why it has placed a strategic focus on managing its supplier relationships in a sustainable way. It is also looking to gradually increase transparency in the deeper value-added stages of the supply chain. This is still one of the greatest challenges and, at the same time, essential for managing sustainability risks, especially in raw material extraction.

Porsche also engages in partnership projects to improve living and working conditions in selected commodity-exporting countries.
